

# Kirill Galkin

## FRONTEND DEVELOPER

I am an experienced developer. My professional journey began with working with .NET technology, then I transitioned to full-stack development, and currently, I have focused on front-end development.

I believe that true mastery is demonstrated through simplicity and clarity in code, which is easy to maintain and enhance. My primary professional skill is the ability to solve tasks within tight deadlines, allowing me to successfully achieve set goals without unnecessary delays.

I hold a technical degree and am always ready for learning and exploring new ways to enhance my skills.

## EDUCATION

2009 | Engineer

Electronics and Physics  
NSTU

## WORK EXPERIENCE

### Frontend Developer / Zyfra

FEB 2022 - JUL 2023 / Full-time, remote / 1 yr 6 mos

- Creating user interfaces and client-side components using the Angular framework to build interactive and responsive web applications
- Collaborating with existing codebases, understanding and adapting to code written by others, and ensuring its integration into ongoing projects
- Improving code quality and maintainability by reorganizing and optimizing existing code without changing its external behavior
- Enhancing code and application performance to improve speed, resource utilization, and overall efficiency.
- Identifying, diagnosing, and fixing errors and issues in applications to ensure their smooth operation
- Designing, implementing, and integrating new features and functionalities to enhance the capabilities of existing applications
- Updating and modernizing old code components and functionality to align with current standards and requirements, while maintaining compatibility with the existing system
- Actively participating in task evaluation and architectural discussions to collaboratively develop the best solutions for the project

### Fullstack Developer / Murano Software

SEP 2020 - FEB 2022 / Full-time, remote / 1 yr 6 mos

## SKILLS

Docker  
React  
Angular  
CSS  
HTML  
Tailwind  
Express  
Next.js  
Node.js  
Typescript  
Git  
...

# Kirill Galkin

## FRONTEND DEVELOPER

- Frontend development using Angular, creating user interfaces and client-side components for applications
- Backend development using the .NET platform
- Working with existing code, which adapting, and making modifications to someone else's code to improve its readability and maintainability
- Conducting code refactoring to enhance its structure, cleanliness, and efficiency
- Optimizing code and application architecture to improve performance and resource efficiency
- Analyzing and resolving errors in applications, including identifying and rectifying various issues and misunderstandings
- Developing new functionality, including adding new features and modules to existing applications
- Rewriting old functionality, updating and modernizing existing components and modules to meet modern standards and requirements

### Senior Developer / Elva

NOV 2017 - SEP 2020 / Full-time, remote / 2 yr 11 mos

- Software development on the .NET platform, creating robust and scalable applications
- Collaborating with existing codebases, conducting code refactoring, and optimizing performance for enhanced efficiency
- Designing and implementing web services to facilitate data exchange
- Front-end development expertise, encompassing JavaScript, TypeScript, and proficiency in frameworks like Angular and React, to create engaging and user-friendly interfaces
- Developing plugins and business processes within the Microsoft Dynamics CRM environment to enhance its capabilities
- Playing a crucial role in project planning, including project design and assessment, ensuring the successful execution of software development projects
- Authoring informative articles about products and solutions for the company's website to enhance product awareness and knowledge sharing
- Mentoring and supervising junior developers through internship programs, fostering their growth and development within the team

### Developer / BIA

SEP 2016 - NOV 2017 / Full-time / 1 yr 3 mos

- Designing and building a warehouse management platform
- Crafting custom scripts tailored to specific needs
- Formulating intricate database queries, procedures, and functions to efficiently handle data
- Developing specialized services to seamlessly import data into the system and facilitate smooth data exchanges with clients
- Providing continuous support and maintenance for the system to ensure its uninterrupted functionality
- Engaging in code refactoring, scrutinizing third-party code for improvements, identifying and rectifying errors, and optimizing performance for enhanced efficiency
